- EPS

**Dimensions:**

FG | 595x595x150mm | 1.44 Kg

### Myron E - Diffuser

In spaces like recording control rooms, sound mastering rooms or other high fidelity listening environments where the sound quality is critical, controlling the bandwidth of diffusion is a priority. Myron E Diffuser was conceived and developed by Artnovion with a specific technical advantage, which allows it to perform way beyond what most of other sound diffusing products are able to deliver. This EPS panel is available in 3 different colours, and is especially easy to install.

### Product finishes

(FG) Product Fire Grade - Furniture Grade
